U.S. Department of the Interior
U.S. Geological Survey

How much water does it take to grow a head of lettuce, or to "grow a hamburger?" When the creek behind your house floods, how is the amount of water flowing measured?

What is pH?
What are the effects of acid rain?

Do you want to view the water cycle in

60 languages? For answers to these and other questions, you can check out the U.S. Geological Survey's Water Science for Schools Web site:
